JOURNAL of ANALYTICAL and APPLIED PYROLYSIS

Subject Index

Air atmosphere
Kinetic study for the thermal decomposition of cellulose and pine sawdust in an air atmosphere, 53
Aliphatic amino acids
Formation of volatile organic compounds from peptides during CO_2-IR-laser irradiation of different mammalian tissues, 65

Bioorganic matter
Formation of volatile organic compounds from peptides during CO_2-IR-laser irradiation of different mammalian tissues, 65
Bis(phenylseleno)lead
Studies on the decomposition of bis(phenylseleno)lead by off-line pyrolysis gas chromatography/mass spectrometry, 27

CO_2-laser pyrolysis
Formation of volatile organic compounds from peptides during CO_2-IR-laser irradiation of different mammalian tissues, 65
Cable electric waste
Vacuum pyrolysis of electric cable wastes, 79
Carbohydrates
Analytical pyrolysis as a tool to determine chemical changes in maize stovers during growth, 105
Carbon black
Vacuum pyrolysis of electric cable wastes, 79
Cellulose
Kinetic study for the thermal decomposition of cellulose and pine sawdust in an air atmosphere, 53
The selection of pyrolysis temperatures for the analysis of humic substances and related materials 1. Cellulose and chitin, 97
Chitin
The selection of pyrolysis temperatures for the analysis of humic substances and related materials 1. Cellulose and chitin, 97
Consecutive reaction
Controlled-rate thermal analysis Kinetic study in thermal dehydration of calcium sulfate dihydrate, 129
Controlled-rate thermal analysis
Controlled-rate thermal analysis Kinetic study in thermal dehydration of calcium sulfate dihydrate, 129
Cooling region
Influence of the cooling section on vapor-phase pyrolysis in laminar-flow reactors, 145

Decomposition
Formation of dysprosium oxide from the thermal decomposition of hydrated dysprosium acetate and oxalate Thermoanalytical and microscopic studies, 35
Dehydration
Controlled-rate thermal analysis Kinetic study in thermal dehydration of calcium sulfate dihydrate, 129
Differential thermal analysis
Formation of dysprosium oxide from the thermal decomposition of hydrated dysprosium acetate and oxalate Thermoanalytical and microscopic studies, 35
Diketopyrrolidines
Formation of volatile organic compounds from peptides during CO_2-IR-laser irradiation of different mammalian tissues, 65
Diketopyrrolines
Formation of volatile organic compounds from peptides during CO_2-IR-laser irradiation of different mammalian tissues, 65
Dynamic experiments
Kinetic study for the thermal decomposition of cellulose and pine sawdust in an air atmosphere, 53

Dysprosium acetate
Formation of dysprosium oxide from the thermal decomposition of hydrated dysprosium acetate and oxalate Thermoanalytical and microscopic studies, 35
Dysprosium oxalate
Formation of dysprosium oxide from the thermal decomposition of hydrated dysprosium acetate and oxalate Thermoanalytical and microscopic studies, 35
Dysprosium oxide
Formation of dysprosium oxide from the thermal decomposition of hydrated dysprosium acetate and oxalate Thermoanalytical and microscopic studies, 35

ESCA
Vacuum pyrolysis of electric cable wastes, 79

Formaldehyde
Pyrolysis of Kraft lignin: yields and correlations, 161
Furnace
Influence of the cooling section on vapor-phase pyrolysis in laminar-flow reactors, 145

Gas chromatography
Analytical pyrolysis as a tool to determine chemical changes in maize stovers during growth, 105
Gas chromatography/mass spectrometry
Studies on the decomposition of bis(phenylseleno)lead by off-line pyrolysis gas chromatography/mass spectrometry, 27
Gas chromatography–mass spectrometry
Formation of dysprosium oxide from the thermal decomposition of hydrated dysprosium acetate and oxalate Thermoanalytical and microscopic studies, 35

Isothermal experiments
Kinetic study for the thermal decomposition of cellulose and pine sawdust in an air atmosphere, 53

Kinetic equation
Controlled-rate thermal analysis Kinetic study in thermal dehydration of calcium sulfate dihydrate, 129
Kinetic equations
Kinetic study for the thermal decomposition of cellulose and pine sawdust in an air atmosphere, 53
Kinetics
Controlled-rate thermal analysis Kinetic study in thermal dehydration of calcium sulfate dihydrate, 129
Kraft lignin
Pyrolysis of Kraft lignin: yields and correlations, 161

Laminar-flow
Influence of the cooling section on vapor-phase pyrolysis in laminar-flow reactors, 145
Lignin
Analytical pyrolysis as a tool to determine chemical changes in maize stovers during growth, 105

Maize
Analytical pyrolysis as a tool to determine chemical changes in maize stovers during growth, 105
Mass spectrometry
Analytical pyrolysis as a tool to determine chemical changes in maize stovers during growth, 105
Methane
Pyrolysis of Kraft lignin: yields and correlations, 161

Organic volatiles
Formation of volatile organic compounds from peptides during CO_2-IR-laser irradiation of different mammalian tissues, 65

Pine sawdust
Kinetic study for the thermal decomposition of cellulose and pine sawdust in an air atmosphere, 53
Polybutadiene
Pyrolysis field ionization mass spectrometry of hydrocarbon polymers, 115
Polyethylene
Vacuum pyrolysis of electric cable wastes, 79
Polyisoprene
Pyrolysis field ionization mass spectrometry of hydrocarbon polymers, 115
Polymer analysis
Recent trends in analytical and applied pyrolysis of polymers, 1
Polymer precursors
Recent trends in analytical and applied pyrolysis of polymers, 1

Polymer recycling
Recent trends in analytical and applied pyrolysis of polymers, 1
Polynorbornene
Pyrolysis field ionization mass spectrometry of hydrocarbon polymers, 115
Protein
Analytical pyrolysis as a tool to determine chemical changes in maize stovers during growth, 105
Py-FIMS
Pyrolysis field ionization mass spectrometry of hydrocarbon polymers, 115
Reaction pathways
Influence of the cooling section on vapor-phase pyrolysis in laminar-flow reactors, 145

Scanning electon microscopy
Formation of dysprosium oxide from the thermal decomposition of hydrated dysprosium acetate and oxalate Thermoanalytical and microscopic studies, 35
Semibatch flow reactor
Pyrolysis of Kraft lignin: yields and correlations, 161

Temperature
The selection of pyrolysis temperatures for the analysis of humic substances and related materials 1. Cellulose and chitin, 97
Thermal decomposition mechanism
Recent trends in analytical and applied pyrolysis of polymers, 1
Thermogravimetry
Formation of dysprosium oxide from the thermal decomposition of hydrated dysprosium acetate and oxalate Thermoanalytical and microscopic studies, 35

Vacuum pyrolysis
Vacuum pyrolysis of electric cable wastes, 79

Wax
Vacuum pyrolysis of electric cable wastes, 79

X-ray diffractometry
Formation of dysprosium oxide from the thermal decomposition of hydrated dysprosium acetate and oxalate Thermoanalytical and microscopic studies, 35
